**CONFIDENTIAL**

FISCHERSPORTS.COM

# #LIVETOSKI

We take skiing seriously. Both Alpine and Nordic skiing.

Our devotion, commitment, and passion for skiing are what drives us. This passion and dedication have fostered a culture of great product innovation. It is hardwired in us.

Our vision as a brand is to be the athlete's number one choice. We see it as our calling to enable new heights of individual performance and unforgettable moments with innovative, user-friendly products.

By doing so, we believe we will enable more people to find and share this passion, because to us skiing is not a lifestyle. It's life.

SKIING IS NOT A LIFESTYLE. **IT'S LIFE.**

FISCHERSPORTS.COM

# THE CHOICE IS YOURS

## RACE

At the highest level, you think in hundredths of a second and measure individual grams. You seek efficiency and speed more than anything. To match, there are three ranges of high-performance equipment for race day and the hard training days leading up to it. For those getting started or aspiring to improve, a full selection of models with race worthy features makes it easy to take the next step.

## FITNESS

Take the opportunity to stay fit on prepared tracks and enjoy cross country skiing with two options in the Fitness collection. The Sport range offers traditional-length sizing for skiers looking to pick up the pace with the improved glide of a longer ski, while the Cruising collection of mid-length skis offers a great skiing experience for recreational skiers who favor improved control and stability.

## ADVENTURE

Step off the groomed tracks and the possibilities are endless. Whether starting from your backdoor or heading for steeper terrain, there is an Adventure ski to match your needs. The collection offers a complete range of widths, sidecuts, edges for control, and optimized grip solutions focused on getting you up, down, and back in safety and comfort.

**BETTER,  
LIGHTER,  
FASTER.**

# SPEEDMAX

The design of the Speedmax system revolves around lightweight, superior power transmission, and tunability. Born on the World Cup to meet the demands and individual needs of the world's best, new designs and construction come to all three components. The new Speedmax boot offers an updated inner boot with improved lacing for secure fit and increased power transfer. The TURNAMIC® World Cup binding provides a solid connection with a new shape that optimizes both weight and strength, and completing the system is the revolutionary Speedmax Helium ski, featuring a Bidirectional Air Core and Helium Shield technology for maximum performance at the incredible weight of only 950g.

**SKIING IS NOT A LIFESTYLE. IT'S LIFE.**

# LIGHTER

## THE NEW BINDING FOR SPEEDMAX.

The extremely light and tool-free adjustable TURNAMIC® Worldcup Speedmax binding enables the most efficient power transfer from the boot to the ski for faster and more efficient skiing. By optimizing the interaction of the boot-binding-plate-ski components, TURNAMIC® allows an unparalleled, dynamic ride to victory.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

NORDIC / BOOTS

# BETTER

## THE NEW SPEEDMAX SERIES.

The new lightweight Speedmax boots provide increased power transmission and agility with improved torsional stiffness and flex pattern combined with an optimized Race Fit. The Cuff and Shell now feature Carbon Zone Control that transports even the slightest impulse down to the ski for ultimate power transfer and control.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

**BASE FINISH**

**FINISH FIRST**

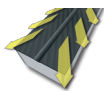

The finishing touch comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.

**DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / PLUS COARSE**

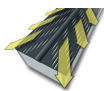

PLUS: Optimised Plus grinding finish from the World Cup with universal range of use. It is suitable for all types of snow and ensures the best speed in a wide range of temperature. COLD: Cold grinding finish from the World Cup. The very flat structure is best suited for very cold temperature and particularly fine snow conditions. PLUS COARSE: Special grinding finish from the World Cup. The deeper and coarser structure is perfectly suitable for coarse-grained and moist snow at temperatures of 0°C and warmer.

**SPEED GRINDING 2.0**

Reworked universal stone grinding for perfect gliding properties in all snow conditions.

**ULTRA TUNING**

Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.

**PREWAXED**

Prepared with glide wax for best gliding properties, protection against dirt and oxidation. Powered by Vauhti.

**CONSTRUCTIONS**

**WORLD CUP TIP**

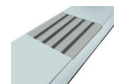

The new lower and shorter tip construction follows the demands of real racing. It reduces the ski's swingweight to a minimum, enabling highest agility.

**HOLE SKI TIP**

Skating construction with composite material to reduce ski tip mass. Requires less effort thanks to reduced swingweight.

**HELIUM SHIELD**

A new exclusively developed mix of carbon and glass fiber laminates enables Fischer to significantly reduce the weight of the ski well-maintaining the same torsional stability and performance characteristics.

**COLD BASE BONDING**

The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.

**GLIDING SIDEWALL**

Newly introduced World Cup technology is a thin waxable layer on the sidewalls to reduce friction for more speed with less energy. Waxable with liquid wax only.

**SKATING 115**

Special camber and snow contact points further apart from each other mean increased stability and a more powerful kick action on hard snow.

**SKATING 610**

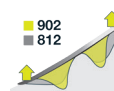

Skating race ski construction for maximum speed through pressure relief at the ski tip and tail. Perfect on compact to soft snow.

**SKATING 61K**

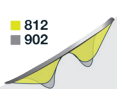

Special skating race ski construction for maximum speed through even more pressure relief at the ski tip and tail. Perfect on soft snow.

**CLASSIC 902**

Classic race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick and safe kick phase. Ideal for: universal to wet conditions, klistler.

**CLASSIC 812**

Classic race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: cold conditions and dry wax conditions.

**DOUBLE POLING**

Special double poling construction. Uniting the benefits of the Skating with those of the Classic construction for a noticeable increase in power when double poling.

**EFFICIENT FORWARD**

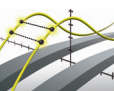

Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.

**PRECISION PAIRING SYSTEM**

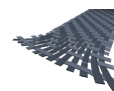

The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.

**COMPUTER FLEX CONTROL**

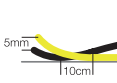

Minimises differences in residual tension and camber pressure. Top climbing and kick performance.

**FISCHER CARBON FIBRE**

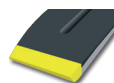

Multiaxial T300 1K carbon fibre. High strength and minimum weight laminate.

**NORDIC ROCKER CAMBER**

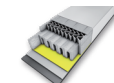

Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.

**RENTAL TAIL PROTECTOR**

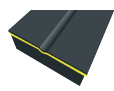

Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.

**POWER LAYER**

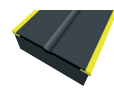

0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.

**POWER EDGE**

Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.

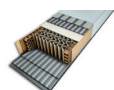

**STEEL EDGE**

Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.

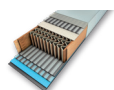

**CORES**

**BIDIRECTIONAL AIR CORE**

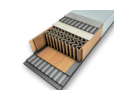

Fischer's highest performing Air Core construction with an unparalleled performance to weight ratio can now be combined with Fischer's proprietary Cold Base Bonding process. This fusion of technologies is now possible with precisely engineered manufacturing processes and equipment.

**AIR CORE HM CARBON**

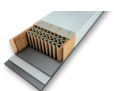

The latest from the World Cup: Proven Air Core material - the most successful ski core with over 80% air content for extremely light weight combined with highly modular carbon fibres.

**AIR CORE CARBON**

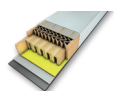

The most successful ski core with over 80% air content for extremely light weight. Optimum performance thanks to torsion-free and break-resistant technology.

**AIR CORE BASALITE PRO**

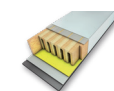

Extremely lightweight and torsion-free construction with highly stable sidewalls. Volcanic basalt fibres for minimum weight and perfect flex characteristics regardless of temperature.

**AIR CORE BASALITE**

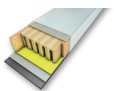

Combination of Air Core material and extremely lightweight wood with air channels for efficient weight saving. Basalt fibres for perfect flex characteristics regardless of temperature.

**AIR TEC BASALITE**

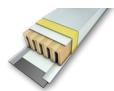

Special air channels in the lightweight wood types reduce weight compared to the Air Channel construction. Basalt fibres for perfect flex characteristics regardless of temperature.

**AIR CHANNEL BASALITE**

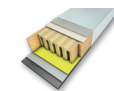

Fibreglass/wood core with integrated air channels to save up to 250g in weight compared to pure wood cores. A further 40g lighter with volcanic basalt fibres.

**AIR TEC STEEL EDGE**

Air channels combined with new, very light wood types. Weight-optimised core for steel edge skis.

**AIR CHANNEL**

Air channels integrated into the fibre glass wood core save weight compared to the pure wood cores and are more resistant to breaking. Better area pressure distribution.

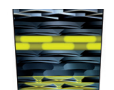

**CLIMBING SYSTEMS**

**TWIN SKIN**

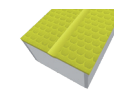

Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair / Mohair mix skins ensure you can rely on the kick action.

**VARIO CROWN**

The newest generation of Crown technology: a combination of Single, Double and Gliding Crown for efficient power transfer and optimum gliding properties.

**OFFTRACK CROWN**

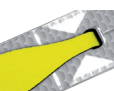

Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.

**FISCHER EASY SKIN**

The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.

**OFFTRACK CROWN & FISCHER EASY SKIN**

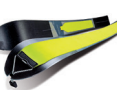

Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on all-wheel drive.

**SUPER SKIN**

Full-length climbing skin, which is easily attached by metal hooks at the end of the ski and elastic attachment in the ski tip for steeper ascents and more grip.

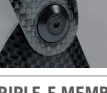

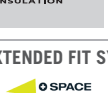

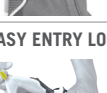

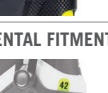

**DUAL SKIN**

The combination of Easy Skin and Super Skin: Depending on the terrain and snow conditions, you can easily switch between the two proven climbing skins.

BOOT TECHNOLOGY

TECH FEATURES		
<b>WORLD CUP CARBON CUFF 2.0</b>  Ultralight carbon cuff ensures extremely light weight, excellent side stability and best forward freedom of movement.	<b>WORLD CUP CARBON CUFF</b>  Perfect side stability and outstanding freedom of movement longitudinally. Shaped specially for the foot, light as a feather and embedded in soft EVA.	<b>HINGED POLYMER CUFF</b>  Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. Canting and EVA padding depending on model.
<b>ANKLE SUPPORT CUFF ASC3</b>  Stable at the side, movable forwards: newly developed ankle support with pivot joint for optimum power transfer, individually adjustable thanks to Powerstrap.	<b>EXTERNAL ANKLE SUPPORT EAS</b>  Anatomical ankle support for a stable hold and power transfer for either skiing technique. Individually adjustable through Powerstrap.	<b>INTEGRAL CARBON CHASSIS</b>  Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.
<b>CARBON HEEL COUNTER</b>  Heel counter made of high-quality carbon fibres. It holds the World Cup Carbon Cuff on the one hand and gives you an optimum heel fit and robust protection on the other.	<b>INJECTED EXTERIOR HEEL CAP</b>  Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.	<b>INTERNAL MOLDED HEEL CAP</b>  Internal anatomically shaped heel cap. Very light and individually thermoformable.
<b>CARBON ZONE CONTROL</b>  Carbon Zone Control enables to provide the optimal flex and torsion stiffness throughout all cross-sections of the integral carbon chassis. Mindfully designed geometrie and carbon-layup for the individual needs of skating, classic or combi boots on cutting-edge race level.	<b>CARBON FUSED TECHNOLOGY</b>  Ergonomic molded cuff and/or heel counter with carbon fiber reinforced polymer structure for impressive power transfer, low weight and secure, comfortable fit.	<b>INTERCHANGEABLE CUFF</b>  Screw-mounted cuff enables easy maintenance and personalization if another cuff size is required. Torx T20 flat head stainless steel M4x8mm screw is secured with Loctite blue threadlocker.
<b>FISCHER SPEED LOCK SYSTEM</b>  New, revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.	<b>WATERPROOF</b>  Waterproof boot design in which the breathable membrane is connected to the lining to ensure a long-lasting, perfect in-boot climate.	<b>TRIPLE-F MEMBRANE</b>  Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.
<b>SEAMLESS UPPER</b>  No-stitching seams in the upper material is not just a matter of aesthetics, it provides also best protection against water and long lasting bonding.	<b>THERMO MOULDBABLE DESIGN</b>  Boots featuring TMD are ready for custom boot fitting. All materials used for the shoe upper are adaptable with heat and special tooling. Easy work for boot service staff and boot-fitters. Optimized fit for consumers with individual orthopedic needs like hallux valgus or ganglions.	<b>SEALED ZIPPER</b>  The specially sealed zipper system ensures that any moisture is kept out.
<b>INTEGRATED GAITER</b>  Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.	<b>LACE COVER</b>  Lace covers for additional protection against the snow and wet conditions and to give you a comfortable warm feeling.	<b>GAITER RING</b>  Fastening for all popular gaiter models for additional protection against the snow and wet conditions.
<b>LEATHER UPPER</b>  Natural upper material made of real leather which has been treated a number of times. Follow enclosed care instructions.	<b>COMFORT GUARD</b>  Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.	<b>THERMO INSOLE</b>  Insole with fleecy top layer and aluminium-lined lower layer for ideal insulation to keep out the cold.
<b>THERMO FIT</b>  Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot. Heat boot to max. 85°C (185°F) in oven. Step in with socks and tighten laces. Foam adapts automatically. Allow 7-10 min of cooling time.	<b>EXTENDED FIT SYSTEM</b>  The dual insole system offers additional fit control. Less volume for slim feet or more space for growing feet. Just add or remove EVA-layer under insole.	<b>FISCHER FRESH</b>  Fischer Fresh puts an end to unpleasant odours, giving you lasting freshness inside the cross country skiing boot with a pleasant smell and feeling inside.
<b>VELCRO STRAP</b>  Tool-free interchangeable Velcro fastener simplifies replacement if needed.	<b>EASY-FIX VELCRO</b>  Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.	<b>HEEL FIT STRAP</b>  Enables individual heel width setting. Gives you optimum hold and heel fit inside the boot.
<b>EASY ENTRY LOOPS</b>  Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.	<b>RENTAL FITMENTS</b>  All the features for rental: size marked outside, antibacterial treatment of lining on the inside. Extremely stable insole and special insert pocket for EAN code (optional).	<b>MADE IN EU</b>  Cross country boots "made in Europe" set the highest standard for our premium products and decrease Fischer's ecological footprint in line with our brand values.
<b>PVC-FREE</b>  We refrain entirely from using PVC (Polyvinylchloride) on boots with the 100% PVC-free logo.		

**BOOT FIT CONCEPT**

The right fit for all requirements. Whether it's shaped for the female foot with the comfort or race version, customised for the feet of young skiers, meeting the comfort requirements of all-rounders or for direct power transfer in racing: the Boot Fit Concept with special lasts is the answer to all the different needs and morphologies of the various consumer groups.

SOLE		
<b>TURNAMIC® SPEEDMAX SOLE</b>  Lightweight 2-piece TURNAMIC® outsole provides optimal flex.	<b>TURNAMIC® RACE SKATE</b>  Extremely sporty skating sole made from Pebax® or Desmopan®. Chassis made of hard material for better power transfer. Arch support for stability and extra torsional stiffness.	<b>TURNAMIC® RACE CLASSIC</b>  Extremely sporty classic sole made from Pebax® or Desmopan® gives you a lower stand height for more stability. Flex grooves and soft sole flex support the smooth kick.

Rottefella® is a registered trademark of the company Rottefella AS, Norway
