FISCHERSPORTS.COM

# #LIVETOSKI

We take skiing seriously. Both Alpine and Nordic skiing. Our devotion, commitment, and passion for skiing are what drives us. This passion and dedication have fostered a culture of great product innovation. It is hardwired in us. Our vision as a brand is to be the athlete's number one choice.

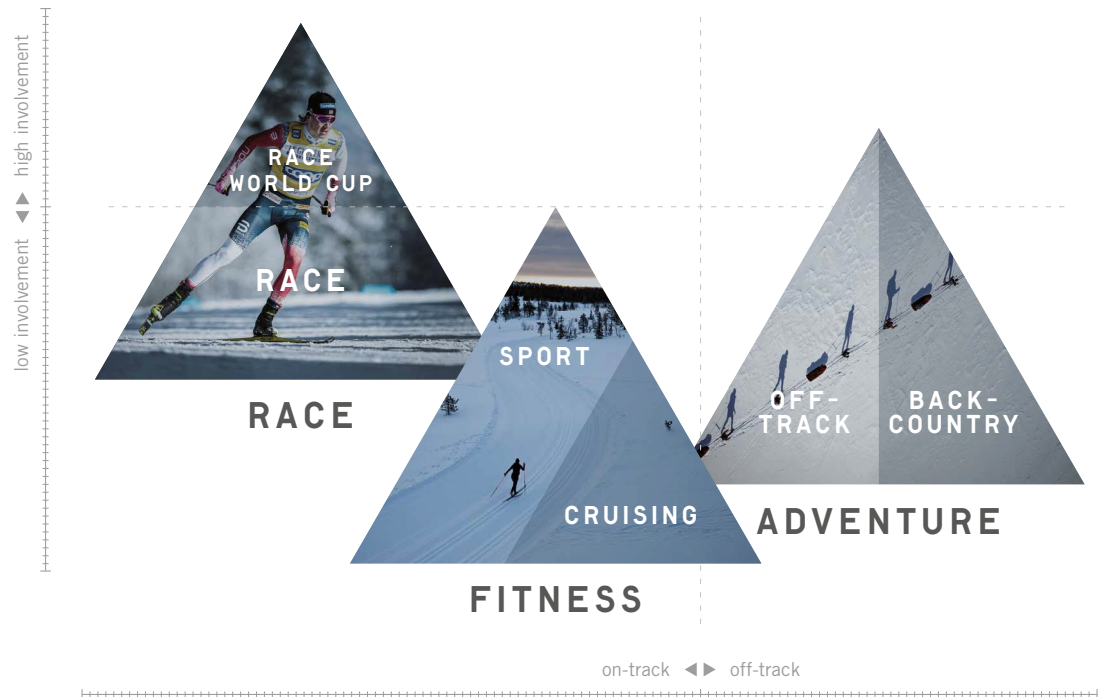

We see it as our calling to enable new heights of individual performance and unforgettable moments with innovative, user-friendly products. By doing so, we believe we will enable more people to find and share this passion, because to us skiing is not a lifestyle. It's life.

SKIING IS NOT A LIFESTYLE. **IT'S LIFE.**

[FISCHERSPORTS.COM](http://FISCHERSPORTS.COM)

# THE CHOICE IS YOURS

## RACE

You think in hundredths of a second and individual grams are critical to you. You seek efficiency more than comfort, and speed more than anything. There are complete ranges of high performance equipment for you for race day as well as for the hard training days leading up to it.

## FITNESS

If you don't have a stopwatch running but like to take the opportunity to stay fit on prepared tracks and enjoy cross country skiing, there are two options within the Fitness collection. The Sport collection with traditional-length skis for recreational skiers who still look for speed and a certain gliding experience. And the Cruising collection of mid-length skis for recreational skiers who appreciate control and stability rather than speed.

## ADVENTURE

If you'll go anywhere for untouched snow and the challenge of unknown trails, Fischer has the right equipment. For skiers who push the limits of themselves and their gear, take a look at the expedition tested and tough Backcountry collection. Where the goal is to experience ungroomed forest trails and challenging hills starting from your own backyard, the reliable Offtrack collection including mid-length skis will get you up, down, and back in safety and comfort.

The final product offer should be taken from the country price lists. Colors and technical specifications in the catalog may deviate from the original. Rights reserved for unannounced changes and typographical errors. © October 2022.

**BETTER,  
LIGHTER,  
FASTER.**

## THE SPEEDMAX SYSTEM.

The Speedmax system revolves around the idea of a lightweight, ultimate power transmission and tunability. Born on the World Cup made for competitive athletes looking for the perfect system based on their individual needs. The new Speedmax boot with increased power transmission and updated Race Fit transports the power and impulses directly through the floating and weight-optimized TURNAMIC® binding down to the new Speedmax Helium ski, featuring the Helium Shield and the Bidirectional Air Core for maximum performance at a revolutionary weight of 950g.

Skis: Speedmax Helium Skate  
Binding: Worldcup Skate IFP

# SKI LIKE A PRO

with the new Aerolite models.

## SKI LIKE A PRO.

The new Aerolite models feature a wide range of skis for anyone who wants to start cross-country skiing for fun and those ambitious to reach the next performance level. Thanks to the use of high-quality, durable ski cores based on Air Core Basalite, every Aerolite model instantly impresses with noticeable lightness both in hand and on snow. The new tip geometry is combined with proven bases, grinds, and sidecuts that have World Cup pedigrees. A specialized construction ensures high speeds and stability when gliding. Your progress is pre-programmed to excel with any Aerolite ski.

# EASY, TUNABLE & DYNAMIC

The binding is the most important link in the Nordic ski setup. Transferring power efficiently from the boot to the ski means smoother, faster skiing with less effort. The TURNAMIC® range brings groundbreaking innovations to Nordic skiers of all ability levels. They are intuitive and easy to use, meaning efficiency and speed for advanced skiers, and convenience for recreational skiers.

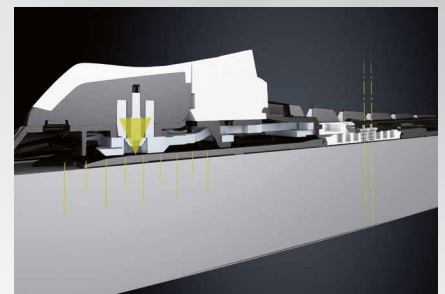

## EASY

What makes the TURNAMIC® setup so compelling is its ease of use. The lightweight bindings quickly slide onto the plate without the need for tools. When it's time to ski, the Turn Lock mechanism can be easily operated even with a gloved hand. Entry and exit in any situation are now as simple as the turn of an easily accessed lever.

## TUNABLE

Technique, temperature, and snow composition all have an influence on ski performance. All TURNAMIC® models offer completely tool free adjustment and fine tuning for individual needs. Simply slide the binding forward for more grip, or slide it rearward to improve glide and speed. Entry-level skiers and World Cup racers all enjoy the same easy tuning benefits.

## DYNAMIC

The TURNAMIC® boot-binding-plate-ski setup provides unmatched dynamic skiing performance. The FLOWFLEX® design enables the ski to flex more freely. This gives serious skiers and racers more efficient power transfer for more speed, while recreational skiers will enjoy improved smoothness and control.

# WORLD CUP PERFORMANCE FOR ALL.

The new Carbonlite models.

Everyone can benefit from technologies designed for the world's best. The new Carbonlite boots are built in the same style as Fischer's World Cup ski boots, then upgraded with a more comfortable fit and improved thermal insulation. Weight has been reduced in the new Carbonlite Skate models and the level of performance has noticeably increased in response. The Carbonlite Classic models offer increased stability when gliding while remaining optimally lightweight. Lossless energy transfer and unmatched control are now affordable for everyone.

SKIING IS NOT A LIFESTYLE. IT'S LIFE.

<b>BASE FINISH</b>		
<b>FINISH FIRST</b> <p>The finishing touch comes from Finish First: the term that covers and unites all the individual technological steps in the course of the final treatment of the base.</p>	<b>DIAMOND TUNED GRINDING (DTG) WORLD CUP PLUS / COLD / PLUS COARSE</b> <p>PLUS: Optimised Plus grinding finish from the World Cup with universal range of use. It is suitable for all types of snow and ensures the best speed in a wide range of temperature. COLD: Cold grinding finish from the World Cup. The very flat structure is best suited for very cold temperature and particularly fine snow conditions. PLUS COARSE: Special grinding finish from the World Cup. The deeper and coarser structure is perfectly suitable for coarse-grained and moist snow at temperatures of 0°C and warmer.</p>	
<b>SPEED GRINDING 2.0</b> <p>Reworked universal stone grinding for perfect gliding properties in all snow conditions.</p>	<b>ULTRA TUNING</b> <p>Unrestricted gliding. Offset base structure makes the ski fast and suitable for all uses.</p>	<b>PREWAXED</b> <p>Prepared with glide wax for best gliding properties, protection against dirt and oxidation. Powered by Vauhti.</p>
<b>CONSTRUCTIONS</b>		
<b>WORLD CUP TIP</b> <p>The new lower and shorter tip construction follows the demands of real racing. It reduces the ski's swingweight to a minimum, enabling highest agility.</p>	<b>HELIUM SHIELD</b> <p>A new exclusively developed mix of carbon and glass fiber laminates enables Fischer to significantly reduce the weight of the ski well-maintaining the same torsional stability and performance characteristics.</p>	<b>COLD BASE BONDING</b> <p>The revolution in ski making: Speedmax technology to protect the homogeneous molecular structure of the base for perfect wax absorption. Guarantees maximum speed.</p>
<b>GLIDING SIDEWALL</b> <p>Newly introduced World Cup technology is a thin waxable layer on the sidewalls to reduce friction for more speed with less energy. Waxable with liquid wax only.</p>	<b>SKATING 115</b> <p>Special camber and snow contact points further apart from each other mean increased stability and a more powerful kick action on hard snow.</p>	<b>SKATING 610</b> <p>Skating race ski construction for maximum speed through pressure relief at the ski tip and tail. Perfect on compact to soft snow.</p>
<b>SKATING 61K</b> <p>Special skating race ski construction for maximum speed through even more pressure relief at the ski tip and tail. Perfect on soft snow.</p>	<b>CLASSIC 902</b> <p>Classic race ski construction with noticeable pressure relief at the ski tip and tail for a direct, quick and safe kick phase. Ideal for: universal to wet conditions, klister.</p>	<b>CLASSIC 812</b> <p>Classic race ski construction with long, dynamic wax pocket pattern for minimum wax loss through friction. Ideal for: cold conditions and dry wax conditions.</p>
<b>DOUBLE POLING</b> <p>Special double poling construction. Uniting the benefits of the Skating with those of the Classic construction for a noticeable increase in power when double poling.</p>	<b>EFFICIENT FORWARD</b> <p>Thanks to the revolutionary composition of proven materials the elasticity of the body of the ski is extremely increased: this guarantees a forgiving kick action and a new, easy-going skiing experience.</p>	<b>PRECISION PAIRING SYSTEM</b> <p>The next generation in ski pairing: fully automatic dynamic measurements of a multitude of pairing criteria ensures precise ski choice and optimised pairing.</p>
<b>COMPUTER FLEX CONTROL</b> <p>Minimises differences in residual tension and camber pressure. Top climbing and kick performance.</p>	<b>FISCHER CARBON FIBRE</b> <p>Multiaxial T300 1K carbon fibre. High strength and minimum weight laminate.</p>	<b>NORDIC ROCKER CAMBER</b> <p>Slightly opened ski tips for perfect gliding properties in unprepared terrain. Enables lighter turning with less effort.</p>
<b>RENTAL TAIL PROTECTOR</b> <p>Special components for extremely robust ski tails ensure they fulfil the durability requirements of ski rental.</p>	<b>POWER LAYER</b> <p>0.2mm thin, extremely lightweight, full-surface high-pressure laminate comprising natural fibres and resin for noticeable ski weight reduction.</p>	<b>POWER EDGE</b> <p>Reinforced ski chassis ensures longer service life. Homogeneous pressure distribution ensures uniform wax wear.</p>
<b>STEEL EDGE</b> <p>Narrow steel edge along the entire length of the ski. Guarantees constant edge contact on every surface.</p>		
<b>CORES</b>		
<b>BIDIRECTIONAL AIR CORE</b> <p>Fischer's highest performing Air Core construction with an unparalleled performance to weight ratio can now be combined with Fischer's proprietary Cold Base Bonding process. This fusion of technologies is now possible with precisely engineered manufacturing processes and equipment.</p>	<b>AIR CORE HM CARBON</b> <p>The latest from the World Cup: Proven Air Core material - the most successful ski core with over 80% air content for extremely light weight combined with highly modular carbon fibres.</p>	<b>AIR CORE CARBON</b> <p>The most successful ski core with over 80% air content for extremely light weight. Optimum performance thanks to torsion-free and break-resistant technology.</p>
<b>AIR CORE BASALITE PRO</b> <p>Extremely lightweight and torsion-free construction with highly stable sidewalls. Volcanic basalt fibres for minimum weight and perfect flex characteristics regardless of temperature.</p>	<b>AIR CORE BASALITE</b> <p>Combination of Air Core material and extremely lightweight wood with air channels for efficient weight saving. Basalt fibres for perfect flex characteristics regardless of temperature.</p>	<b>AIR TEC BASALITE</b> <p>Special air channels in the lightweight wood types reduce weight compared to the Air Channel construction. Basalt fibres for perfect flex characteristics regardless of temperature.</p>
<b>AIR CHANNEL BASALITE</b> <p>Fibreglass/wood core with integrated air channels to save up to 250g in weight compared to pure wood cores. A further 40g lighter with volcanic basalt fibres.</p>	<b>AIR TEC STEEL EDGE</b> <p>Air channels combined with new, very light wood types. Weight-optimised core for steel edge skis.</p>	<b>AIR CHANNEL</b> <p>Air channels integrated into the fibre glass wood core save weight compared to the pure wood cores and are more resistant to breaking. Better area pressure distribution.</p>
<b>CLIMBING SYSTEMS</b>		
<b>TWIN SKIN</b> <p>Two separate skin strips arranged in offset positions and with variable base-depth integration result in smooth and balanced gliding. Mohair / Mohair mix skins ensure you can rely on the kick action.</p>	<b>VARIO CROWN</b> <p>The newest generation of Crown technology: a combination of Single, Double and Gliding Crown for efficient power transfer and optimum gliding properties.</p>	<b>OFFTRACK CROWN</b> <p>Climbing system in all terrain, especially away from the prepared tracks and also in difficult terrain conditions. Developed exclusively for Fischer.</p>
<b>FISCHER EASY SKIN</b> <p>The easiest way to attach climbing skins: combination of adhesion and click-in-place for reliable grip and straightforward attachment and removal.</p>	<b>OFFTRACK CROWN &amp; FISCHER EASY SKIN</b> <p>Exclusive climbing system combination for steel edge skis. If Offtrack Crown no longer grips in steep terrain, it's time for Fischer Easy Skin. Like a switch-on-all - wheel drive.</p>	<b>SUPER SKIN</b> <p>Full-length climbing skin, which is easily attached by metal hooks at the end of the ski and elastic attachment in the ski tip for steeper ascents and more grip.</p>
<b>DUAL SKIN</b> <p>The combination of Easy Skin and Super Skin: Depending on the terrain and snow conditions, you can easily switch between the two proven climbing skins.</p>		

TECH FEATURES

<p><b>WORLD CUP CARBON CUFF 2.0</b>                   Ultralight carbon cuff ensures extremely light weight, excellent side stability and best forward freedom of movement.</p>	<p><b>WORLD CUP CARBON CUFF</b>                   Perfect side stability and outstanding freedom of movement longitudinally. Shaped specially for the foot, light as a feather and embedded in soft EVA.</p>	<p><b>HINGED POLYMER CUFF</b>                   Ergonomic molded cuff for remarkable side hold with good freedom of movement to the front and back. Easy to adjust with Velcro fastener. Canting and EVA padding depending on model.</p>
<p><b>ANKLE SUPPORT CUFF ASC3</b>                   Stable at the side, movable forwards: newly developed ankle support with pivot joint for optimum power transfer, individually adjustable thanks to Powerstrap.</p>	<p><b>EXTERNAL ANKLE SUPPORT EAS</b>                   Anatomical ankle support for a stable hold and power transfer for either skiing technique. Individually adjustable through Powerstrap.</p>	<p><b>INTEGRAL CARBON CHASSIS</b>                   Outer sole, insole and side stabilisation elements manufactured from the same sheet of carbon. For previously unattained light weight with optimum stability power transfer.</p>
<p><b>CARBON HEEL COUNTER</b>                   Heel counter made of high-quality carbon fibres. It holds the World Cup Carbon Cuff on the one hand and gives you an optimum heel fit and robust protection on the other.</p>	<p><b>INJECTED EXTERIOR HEEL CAP</b>                   Good heel cradling and robust protection all in one: exterior heel cap for even better power transfer.</p>	<p><b>INTERNAL MOLDED HEEL CAP</b>                   Internal anatomically shaped heel cap. Very light and individually thermoformable.</p>
<p><b>CARBON ZONE CONTROL</b>                   Carbon Zone Control enables to provide the optimal flex and torsion stiffness throughout all cross-sections of the integral carbon chassis. Mindfully designed geometrie and carbon-layup for the individual needs of skating, classic or combi boots on cutting-edge race level.</p>	<p><b>CARBON FUSED TECHNOLOGY</b>                   Ergonomic molded cuff and/or heel counter with carbon fiber reinforced polymer structure for impressive power transfer, low weight and secure, comfortable fit.</p>	<p><b>INTERCHANGEABLE CUFF</b>                   Screw-mounted cuff enables easy maintenance and personalization if another cuff size is required. Torx T20 flat head stainless steel M4x8mm screw is secured with Loctite blue threadlocker.</p>
<p><b>FISCHER SPEED LOCK SYSTEM</b>                   New, revolutionary quick lock with minimum size and weight. Simply pull the laces tight – that's it! The system is safe and reliable.</p>	<p><b>WATERPROOF</b>                   Waterproof boot design in which the breathable membrane is connected to the lining to ensure a long-lasting, perfect in-boot climate.</p>	<p><b>TRIPLE-F MEMBRANE</b>                   Special membrane ensures that conditions inside the boot are perfect: dry, warm and breathable.</p>
<p><b>SEAMLESS UPPER</b>                   No-stitching seams in the upper material is not just a matter of aesthetics, it provides also best protection against water and long lasting bonding.</p>	<p><b>THERMO MOULDABLE DESIGN</b>                   Boots featuring TMD are ready for custom boot fitting. All materials used for the shoe upper are adaptable with heat and special tooling. Easy work for boot service staff and boot-fitters. Optimized fit for consumers with individual orthopedic needs like hallux valgus or ganglions.</p>	<p><b>SEALED ZIPPER</b>                   The specially sealed zipper system ensures that any moisture is kept out.</p>
<p><b>INTEGRATED GAITER</b>                   Integrated, easily adjustable gaiter for optimum protection in deep snow. Waterproof lightweight material and sealed zip for maximum cross country skiing enjoyment even in untracked terrain.</p>	<p><b>LACE COVER</b>                   Lace covers for additional protection against the snow and wet conditions and to give you a comfortable warm feeling.</p>	<p><b>GAITER RING</b>                   Fastening for all popular gaiter models for additional protection against the snow and wet conditions.</p>
<p><b>LEATHER UPPER</b>                   Natural upper material made of real leather which has been treated a number of times. Follow enclosed care instructions.</p>	<p><b>COMFORT GUARD</b>                   Very lightweight, water-repelling insulation material for additional thermal protection in the forefoot and toe area.</p>	<p><b>THERMO INSOLE</b>                   Insole with fleecy top layer and aluminium-lined lower layer for ideal insulation to keep out the cold.</p>
<p><b>THERMO FIT</b>                   Thermally formable foam cushioning with outstanding thermal insulation – a perfect fit for the individual shape of the foot. Heat boot to max. 85°C (185°F) in oven. Step in with socks and tighten laces. Foam adapts automatically. Allow 7-10 min of cooling time.</p>	<p><b>EXTENDED FIT SYSTEM</b>                   The dual insole system offers additional fit control. Less volume for slim feet or more space for growing feet. Just add or remove EVA-layer under insole.</p>	<p><b>FISCHER FRESH</b>                   Fischer Fresh puts an end to unpleasant odours, giving you lasting freshness inside the cross country skiing boot with a pleasant smell and feeling inside.</p>
<p><b>VELCRO STRAP</b>                   Tool-free interchangeable Velcro fastener simplifies replacement if needed.</p>	<p><b>EASY-FIX VELCRO</b>                   Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.</p>	<p><b>HEEL FIT STRAP</b>                   Enables individual heel width setting. Gives you optimum hold and heel fit inside the boot.</p>
<p><b>EASY ENTRY LOOPS</b>                   Practical entry loops and wide-opening designs guarantee that boots can be put on/taken off comfortably.</p>	<p><b>RENTAL FITMENTS</b>                   All the features for rental: size marked outside, antibacterial treatment of lining on the inside. Extremely stable insole and special insert pocket for EAN code (optional).</p>	<p><b>MADE IN EU</b>                   Cross country boots "made in Europe" set the highest standard for our premium products and decrease Fischer's ecological footprint in line with our brand values.</p>
<p><b>PVC-FREE</b>                   We refrain entirely from using PVC (Polyvinylchloride) on boots with the 100% PVC-free logo.</p>		

BOOT FIT CONCEPT

The right fit for all requirements. Whether it's shaped for the female foot with the comfort or race version, customised for the feet of young skiers, meeting the comfort requirements of all-rounders or for direct power transfer in racing: the Boot Fit Concept with special lasts is the answer to all the different needs and morphologies of the various consumer groups.

SOLE

<p><b>TURNAMIC® SPEEDMAX SOLE</b>                   Lightweight 2-piece TURNAMIC® outsole provides optimal flex.</p>	<p><b>TURNAMIC® RACE SKATE</b>                   Extremely sporty skating sole made from Pebax® or Desmopan®. Chassis made of hard material for better power transfer. Arch support for stability and extra torsional stiffness.</p>	<p><b>TURNAMIC® RACE CLASSIC</b>                   Extremely sporty classic sole made from Pebax® or Desmopan® gives you a lower stand height for more stability. Flex grooves and soft sole flex support the smooth kick.</p>
---	---	---

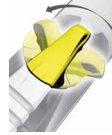

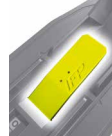

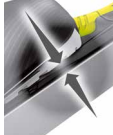

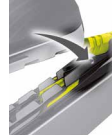

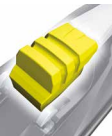

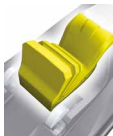

BOOT TECHNOLOGY

SOLE

<p><b>TURNAMIC® PERFORMANCE</b></p>  <p>The robust and flat construction for sporty, classic style skiing enables a longer gliding phase through easier balance. 2K-Desmopan® material mix for improved performance.</p>	<p><b>TURNAMIC® EASY WALK</b></p>  <p>A new wider sole profile and softer material provides a smooth skiing flex and easier off-ski walking.</p>	<p><b>TURNAMIC® TOURING</b></p>  <p>The flat construction enables a safe walk and good balance on the skis. The profile is non-slip and self-cleaning. The wear-resistant 1K-Desmopan® material mix is long-lasting and acts against the cold.</p>
<p><b>TURNAMIC® JUNIOR</b></p>  <p>The flat, robust construction enables a good stance and easier balance. The profile is non-slip, self-cleaning and Desmopan® acts as an insulation layer against the cold.</p>	<p><b>ROTTEFELLA® XPLORE</b></p>  <p>Innovative BC sole featuring integrated spring-pin technology. To be used with ROTTEFELLA® Xplore binding system.</p>	<p><b>ROTTEFELLA® BC</b></p>  <p>Optimum support in difficult terrain. Reliable walking thanks to non-slip profile.</p>
<p><b>VIBRAM® 75MM SOLE</b></p>  <p>Standard Vibram® 75 sole. Excellent support in difficult terrain. Non-slip profile with specially developed rubber mixture.</p>	<p><b>SNOW GRIP RACE</b></p>  <p>Non-slip rubber sole with good thermal insulation for use on winter boots.</p>	<p><b>SNOW GRIP / SNOW GRIP XL</b></p>  <p>Non-slip rubber sole with good thermal insulation for use on winter boots. XL particularly broad.</p>

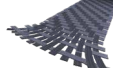

BINDING TECHNOLOGY

TECH FEATURES

<p><b>INTEGRATED FIXATION PLATE (IFP)</b></p>  <p>Modern interface for screw-free binding mounting on the ski. The two-part "Integrated Fixation Plate" is weight-optimised and enables you to adjust ski performance without tools in 7 click-in settings.</p>	<p><b>SAFE LOCK</b></p>  <p>Lightweight locking mechanism eliminates accidental openings due to errant pole or ski hits. An audible click confirms that the lever is locked.</p>	<p><b>TURN LOCK</b></p>  <p>The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.</p>
<p><b>TOOL FREE</b></p>  <p>No tools are required for mounting and assembly and this is optimised for easy handling even in difficult conditions on the track. A clearly visible display in the windows next to the setting unit and the click-in presetting make positioning even easier.</p>	<p><b>DOUBLE LOCK SLIDER</b></p>  <p>Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).</p>	<p><b>CLIP LOCK</b></p>  <p>Clip for easy fixation and adjustment of the binding on the IFP (Integrated Fixation Plate).</p>
<p><b>FLOWFLEX®</b></p>  <p>The two-part plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.</p>	<p><b>TORSION-PROOFED BODY</b></p>  <p>The well-thought-out (in all details) housing construction with broad contact surface and torsionally stiff geometry is the basis for direct power transfer. Previously unattained ski control and forward thrust go hand in hand with low weight.</p>	<p><b>STABILIZER</b></p>  <p>The shape of the skate housing keeps the ski balanced horizontally after every kick. Perfect ski control – even when the ski is in the air.</p>
<p><b>HEEL PRE-ADJUST</b></p>  <p>Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.</p>	<p><b>LOW PROFILE</b></p>  <p>The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel on the snow at the same time.</p>	<p><b>STEP-IN</b></p>  <p>The Step-In mechanism makes it extremely easy to step into the binding. You can hear a clear 'click' when the binding is closed properly.</p>
<p><b>SKATING FLEXOR</b></p>  <p>Flexor developed for skating style with flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.</p>	<p><b>CLASSIC FLEXOR</b></p>  <p>Flexor developed for classic style with flex grade 7.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.</p>	<p><b>JUNIOR FLEXOR</b></p>  <p>Flexor developed for the target group with flex grade 5.0 and slightly progressive power flow. It ensures the best ski control from the beginning of the Motion and a secure fit inside binding housing. Low-wear materials are what make this high-performance absorber stand out.</p>

ROLLERSKI TECHNOLOGY

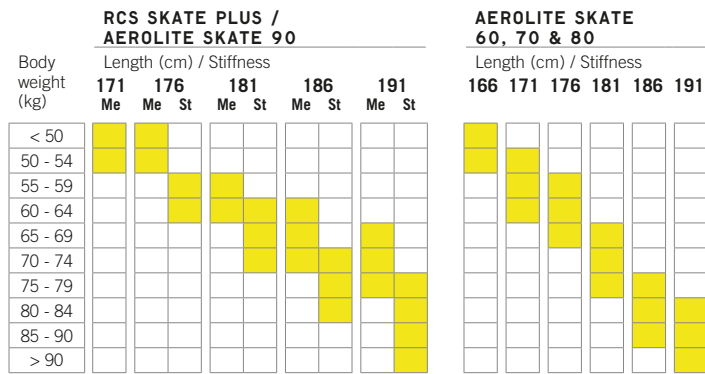

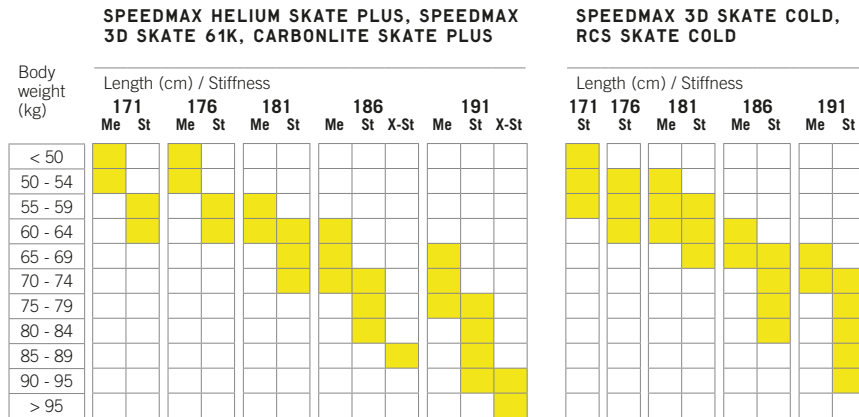

TECH FEATURES

<p><b>BRIDGE ARCH SHAPE</b></p>  <p>Skroller geometry permitting a low-to-the-ground stance and authentic ski flex performance and ride for an excellent snow ski replication.</p>	<p><b>FULL CARBON CONSTRUCTION</b></p>  <p>The frame construction is made of 100% carbon fabric, which ensures extremely light weight, durability and high stability. This results in a ski-like performance.</p>	<p><b>HIGH MODULUS E-GLASS CONSTRUCTION</b></p>  <p>Very lightweight fiberglass construction for optimal flex and stable kick. Forgiving and easy to ski even during intense use.</p>
<p><b>ALUMINIUM FRAME</b></p>  <p>Very robust and torsionally stiff aluminium frame which also delivers optimum weight performance at the same time. Runs very smoothly as a result with optimum stability when rollerskiing.</p>	<p><b>PRECISION DRIVE 2.0</b></p>  <p>Use of extremely tight-tolerance ball bearings increases speed while offering a smooth ride and increased longevity.</p>	<p><b>SPLASH GUARD 70 / 80 / 100 / 100S</b></p>  <p>Splash protection for wheels. The very light and robust plastic part can be added / removed easily with just one screw.</p>
<p><b>FULL RUBBER WHEEL 70</b></p>  <p>Wider, durable, high-traction rubber wheel enhances shock attenuation and braking. Wider design is more smooth and stable.</p>	<p><b>LOW PROFILE WHEEL 100</b></p>  <p>The all-rubber wheel with aluminium rim offers optimum grip on surfaces for a powerful kick action. The wheel also has perfect damping characteristics with very good weight performance.</p>	

# LENGTH RECOMMENDATION

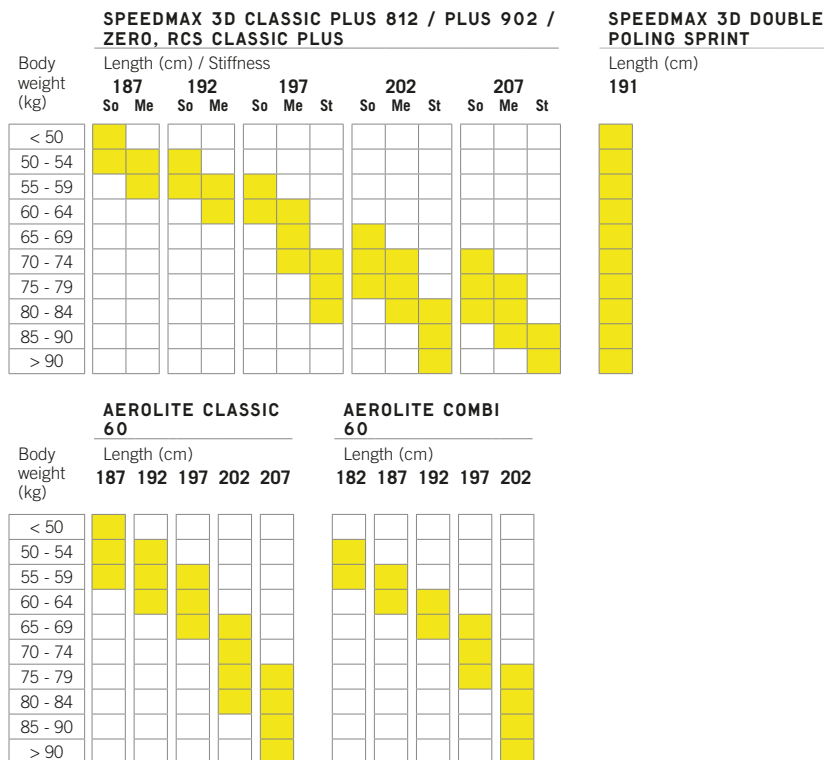

## LENGTH RECOMMENDATION RACE SKATING

Not all models are available in the specified lengths and hardnesses. See product pages for details.  
Stiffness: So = Soft, Me = Medium, St = Stiff

## LENGTH RECOMMENDATION RACE CLASSIC

Not all models are available in the specified lengths and hardnesses. See product pages for details.

## LENGTH RECOMMENDATION TWIN SKIN RACE

**XC-WAX STAND**

Article no. Z91607  
Material Aluminium, wood  
Unit 1

- For all nordic binding systems and for unmounted skis too
- Because of slidable plates adaptable for all ski lengths

**XC-FIXATION RUBBER (WAX STAND)**

Article no. Z91718  
Unit 2

**XC-ADJUSTING SCREW / HANDLE (WAX STAND)**

Article no. Z91809  
Unit 1

**XC-SPRING (WAX STAND)**

Article no. Z91412  
Unit 1

**XC-CLAMP (WAX STAND)**

Article no. Z91518  
Unit 2

**XC-TEST BOARD**

Article no. X19404  
Size 240 x 40cm  
Material Metal  
Unit 1

Using the XC-TEST BOARD is generally a good way of selecting classic and skating skis. This method is indispensable for choosing classic skis with a waxed base. The advantage is that you can choose the ski that ideally matches the customer's weight. You are then also able to see the length of the waxed zone and mark it on the ski.

**XC-TEST BOARD HANDLE**

Article no. X19604  
Material Wood  
Unit 1

**XC-TEST BOARD ADJUSTING PLATE**

Article no. X19504  
Material Metal  
Unit 1

**XC-TEST BOARD BASE FRAME**

Article no. X19804  
Material Aluminium  
Unit 1

- Base frame for the elevation of the test board
- Easier to use for the shop kits

**XC-SELECTION BOARD**

Article no. W23015  
Size 12 x 220cm  
Material Metal  
Unit 1

With the help of the XC-SELECTION BOARDS you can determine the wax pocket length and position on classic wax skis without the skier having to stand on the skis. Measuring gauges with different thicknesses can be used to make measuring even more precise for different types of wax.

**XC-SELECTION BOARD BASE (ACCESSORY)**

Article no. W23115  
Size 60 x 60cm  
Material Metal  
Unit 1

- Accessory for free-standing use
